

**Becky Blake**

# There is a cure for Autism...and I have it!

**What every parent needs to know to help his/her child come OUT of Autism (also works with brain injuries)**

**B**ecky Blake, Psychoneurology PhD candidate, author of Break Through Social, Sensory, Speech Barriers; All Children Can Reach Their True Potential, international public speaker, has spent the last 20+ years researching and receiving degrees in the Neuro-sciences. She is an expert on the brain, learning, development, nutrition organized movement, personal development, mindset, parenting, behavior. As a result of this, her program, the Blake Method, has created great results for families around the world. She has dedicated her life to helping families in their homes, in schools and online.

She is a Mom on a Mission. Becky was devastated when her twin son was diagnosed at 3 with Static Encephalopathy, mental retardation and later Autism. As a single mother of 3 young children with little education and no job, Becky was not about to let the doctor's limitations stop her from creating the most compelling future for her son.

The Blake Method helps children come OUT of Autism in 3 – 6 months as far away as Denmark! It is a scientific brain, body-based program. She has been able to make connections others have yet to make. Non verbal children start talking in as little as two days, children exhibit better behavior in two weeks and come OUT of Autism in 3-6 months. Also works with other neuro delays.

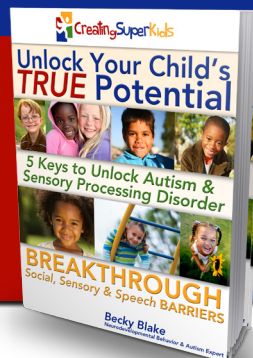

## STORY IDEAS

- 5 simple steps to Stop Tantrums Forever! (all ages)
- I'm dispelling the biggest myth about Autism: that it lasts a life time.
- Why most therapies for Autism have done little to get kids OUT of Autism – until now.
- Non verbal kids can talk in as little as 2 days!
- October is Bullying Awareness Month – 3 areas not looked at that are needed to stop bullying.

Add this simple product to your family's diet, you will lose fat while increasing your child's brain power!

3 Simple activities will help you lose fat, gain energy while also increasing your child's brain power, behavior and learning.

## TRENDS I CAN TALK ABOUT

Autism in the US is 1:88 children, Why bullying is happening and a different way of looking at it, why there are more children in special education, special education conspiracy theory, what all mothers should know before and after birth (especially C-Sections), how teachers can help all students be better learners, and how to help children create more compelling futures no matter their lifestyle.

Other trends I can speak about are: better behavior for all children, why children are having a hard time learning to read, sit still, focus, how to lead happier lives, create your life on your terms, better brain, body, energy, I have found the fountain of youth, and it is inside of us.

## FUTURE PROJECTS

Create a documentary following several families, create a reality show following her around the world working with families in their homes documenting the quick life changes, family dynamics, create a certification program for professionals and educators, write more books, create more products, do more public speaking events.
